B
C
D
B
C
D
A
Fixed: entities, splits, event/availability times, masks and counts
Same numerical inputs, targets and forecast windows
b
Fixed-model reliance
Aligned fitting + validation selection
f
One frozen checkpoint
Aligned test loss
Altered test loss
Δfixed = altered − aligned
c
Value after condition-specific refitting
Aligned fit
+ matching validation
f
Aligned test loss
Altered fit
+ matching validation
fT
Altered test loss
Δretrain = altered − aligned
